To Whom It May Concern,

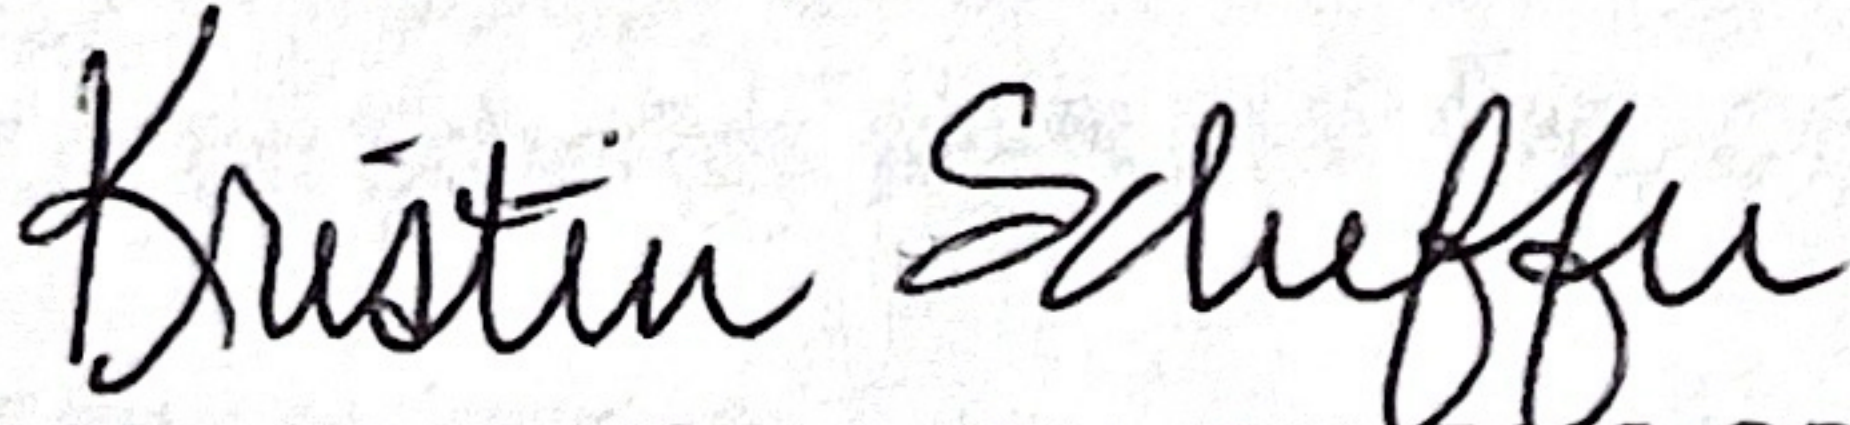

I am pleased to write this letter of recommendation for Charna Terveus who is applying to your facility. Charna is currently enrolled in the nursing program at the College of Nursing and Health Innovation (CONHI) at the University of Texas at Arlington.

As her clinical instructor, I found Charna to be hardworking and dedicated, striving to gain whatever practical knowledge and experience she possibly could. Charna is organized and professional in her approach to her clinical assignments. Her assignments were always very thorough and completed ahead of deadlines.

Charna approached every opportunity with a proactive mindset. Her dedication to learning and patient care was evident in her interactions with both staff and patients. The nurses observed that Charna demonstrated patience, compassion, and empathy during her patient care interactions. While OB is not where Charna ultimately will end up in her career, she did not back away from learning and showed a unique passion for connecting with and understanding the OB and neonatal patients.

Charna showed particular interest in the NICU population and her coach that shift was very complimentary of how hands on and inquisitive she was during learning. Her dedication and commitment to pursuing excellence in her clinical assignments, her passion for serving others, and her previous work experience will serve her well in the nursing field. I believe Charna would be a great asset to your program. If you have any further questions, please reach out to me.

Thank you for your time,

Kristin Scheffer, MSN, RN, RNC-OB, C-EFM, NPD-BC
