To Whom It May Concern,

It is my pleasure to recommend Charna Terveus, whom I had the privilege of supervising as her Nursing Clinical Instructor. Throughout her clinical rotation, she consistently demonstrated the qualities that define an exceptional future nurse: strong communication, sound clinical judgment, and genuine empathy.

From the beginning, she distinguished herself with her ability to communicate clearly and compassionately with patients, families, and members of the healthcare team. She listens attentively, asks thoughtful questions, and conveys information in a way that builds trust and promotes patient understanding. These skills allowed her to form meaningful therapeutic relationships and contribute positively to the clinical environment.

Her critical thinking abilities were equally impressive. She approached each patient scenario with curiosity and professionalism, carefully assessing situations, identifying priorities, and applying evidence-based reasoning to her decisions. Whether managing routine tasks or navigating more complex clinical situations, she demonstrated maturity, preparedness, and a strong commitment to safe, high-quality care.

What truly sets her apart is her empathy. She consistently showed kindness, patience, and respect to every patient she encountered. She has a natural ability to make others feel seen and supported, even during vulnerable moments. This emotional intelligence, paired with her clinical competence, makes her exceptionally well-suited for the nursing profession.

I am confident that Charna will be an asset to any nursing team or academic program she chooses to join. She brings dedication, integrity, and a sincere passion for patient care. I recommend her without reservation.

Please feel free to contact me if you need any additional information.

Sincerely,

Kirsten Burns
